

Seminar Series in Soft Nanosciences - 2026-2027

OPEN seminars on Mondays, 12 a.m.
PHITEM A – amphi central

Interfacial structure of long chain ionic liquids

Sept. 21, 2026

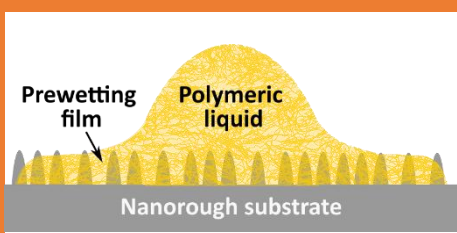

Audrey STEINBERGER, LPENSL
(Lyon)

Fragmentation of a liquid jet by a high-speed gas jet

Nov. 9, 2026

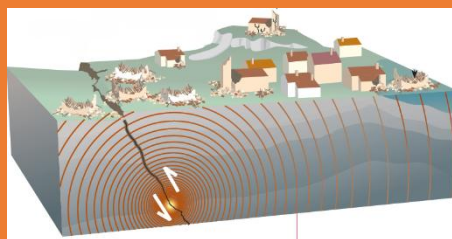

Nathanaël MACHICOANE,
LEGI

Wetting dynamics on nanoscale-rough substrates

Sept. 28, 2026

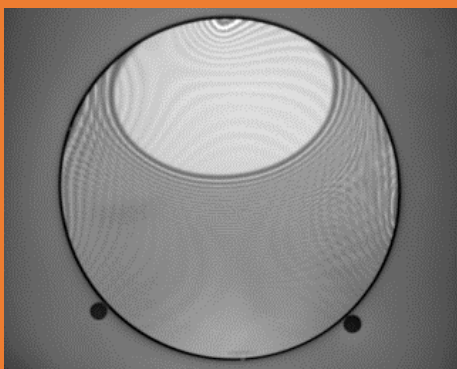

Marion GRZELKA,
LLB (Saclay)

Solid friction: from microcontacts to earthquakes

Nov. 23, 2026

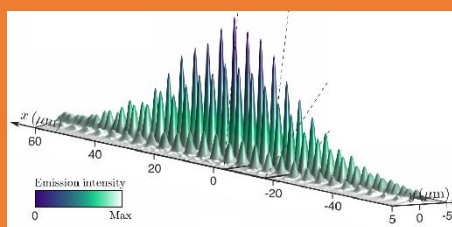

Elsa BAYART, LIPhy

Hydrophilic direct bonding: How does it work? What are the physical mechanisms?

Oct. 12, 2026

Frank FOURNEL, LETI

Kardar-Parisi-Zhang universality: 40 years and still growing

Nov. 30, 2026

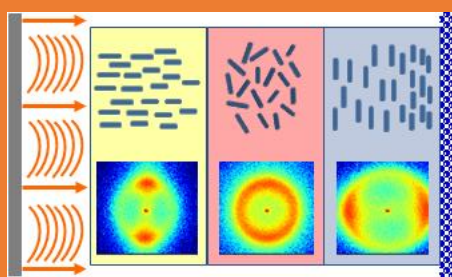

Léonie CANET, LPMMC

Toward post Li-ion batteries: Li metal case study

Oct. 19, 2026

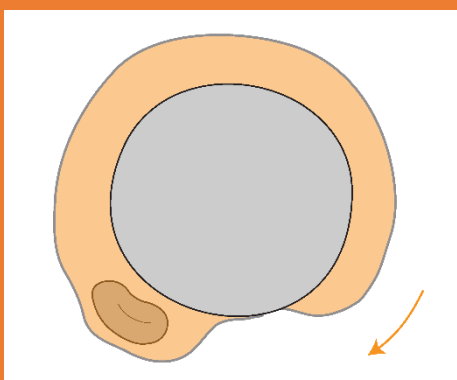

Didier DEVAUX, LEPMI

Valorization of Neutralization Sludges into Fluorspar for Steelworks

Dec. 7, 2026

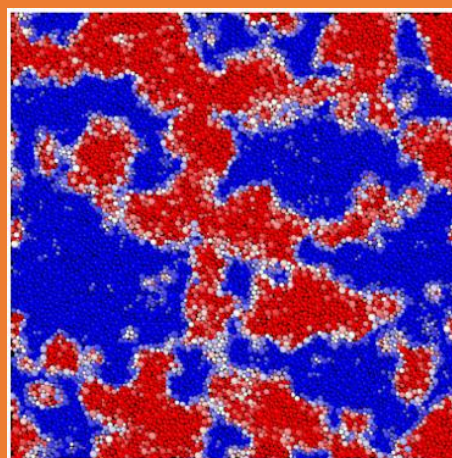

Assane SENE, APERAM
(Isbergues)

Thermal adaptation of tissue dynamics during embryogenesis

Nov. 2, 2026

Manon VALET, LIPhy

Predicting the Dynamics of Amorphous Materials from Static Snapshots Using Machine Learning

Dec. 14, 2026

Misaki OZAWA, LIPhy
